

FROM .13 .SEP .2018\ GRADE 2 TO 6

BRAINOBRAIN

COURSE THAT MAKES A DIFFERENCE

Math is fun using Abacus !

WHY IN SFO \AFTER SCHOOLTIME?

It is a nice venue to let younger children play and practice with Abacus to improve their concentration, memory, self confidence and math skills. By being present in the classroom we can develop and improve where it has the most impact on students' education and success.

What is Brainobrain ?

A FUN FILLED TRAINING PROGRAMME TO IMPROVE THE CHILDREN'S CONCENTRATION SKILLS AND CONFIDENCE IN MATHEMATICS

Secure place for your child !

Play with Brain

- Like any other organ of human body, our brain also needs regular exercise to keep it fit and sharp.
- Brainobrain is a fun filled arithmetic training programme for primary schools.
- Regular exercise of Brain using numbers and Abacus is a Brain Gym for the Children.
- Training nurtures and kindles the brain development of a child in improving concentration, memory, Mathematical skills and learning ability.
- Studies show that a child excel in math relatively performs well in other domains, resulting in good academic results.

Every Thursday: 17.15-19.15

Parent feedback

By Priotti!

"Our youngest daughter Sandra started first level at Little Brainobrain programme, and Sophia, older one is going at First level Braionbrain regular programme. This was a very good decision and we are very proud to see our children progressing so fast

and so much - especially Sandra who has much better concentration now and much stronger focus on everything she does. Each morning our family starts with joy and happiness in new expectation about school activities and creative workshops in Brainobrain
