2)= 250NOK**

To develop mental, physical, social skills, emotional, personality, self confidence, arithmetic skills and increase their confidence towards academic excellence !

"Alfred is 6 years old, and started littlebob almost one year ago. From this he has gained self assurance, and in the yearly test ("Kartleggingsprøve") he got a top score in both reading and mathematics. He is now able to multiply a 3-digit number with a 1-digit number on the abacus.."

-Christian Bøe

At tender age

CHILDREN DEVELOP QUICK LEARNING AND SOCIAL SKILLS TO BE CONFIDENT AND AN INDEPENDENT LEARNER .

Why in Sfo\After school Time?

SFO is a nice venue to let younger children play and practice with Abacus to improve their concentration, memory, self confidence and math skills.

By being present in the classroom we can develop and improve where it has the most impact on students' education and success
